

2020-2021 ESU2 Independent Covid-19 Plan

Students Served: 42

Counties Involved: Dodge, Saunders, and Washington (**Three Rivers Health Department**)

**ESU2 Independent is in Saunders County*

Cuming, Burt (**Elkhorn Logan Valley Health Department**)

Butler (**Four Corner Health Department**)

Douglas (**Douglas County Health Department**)

Beginning on the first day of school, staff will routinely focus on teaching students how to log in to potential online or e-learning sites and other independent learning strategies so they are prepared should meeting in person not be an option.

Daily Safety Routines When All Counties are in a Green Dial – low risk threat level:

- Upon entering the building, the students will wash their hands. Staff will supervise.
- Social distancing - No more than five students at a time will be allowed at the check-in/check-out desk.
- Social distancing – student desks will be a minimum of 6’ apart. No more than two students will be allowed at a U-shaped table.
- When a student or staff members enters or leaves a classroom or the gym, they will be required to use at least one pump of hand sanitizer.
- Every time a student group rotates out of a classroom, support staff will sanitize all desks and work areas with Lysol or a bleach solution.
- Bathrooms, door handles and work surfaces will be sanitized multiple times throughout the school day.
- Writing utensils will be labeled with each student’s name.
- Chromebooks will be sanitized each day at the end of school.
- Student cell phones will be stored in labeled baggies.
- Students or staff who feel ill will have their temperatures taken and be isolated from others (landing to the basement). Staff will go home immediately, and students will go home with a family member when they arrive.
- Repeatedly educate students and staff about good sanitary practices (Practice Zooming, Google Classroom, SpellingCity, IXL, etc.)
- Visitors are required to masks
- Plexiglass for workers who are in close contact (SLP, Therapists, OT, Probation, etc.)
- ABM: daily sanitize handles, all work surfaces, and both restrooms.

Environmental Protection Agency (EPA) approved disinfectants that kill Coronavirus:

Bleach: You can make a disinfecting solution by combining 4 teaspoons (about 20 milliliters) of household bleach and 1 quart (slightly less than 1 liter) of water.

Lysol: Lysol Disinfectant Spray and Lysol Disinfectant Max Cover Mist

Recommendations:

Masks or shields for students and staff

Ask students to bring sanitizing wipes to use frequently

Orange Dial:

Stagger arrival and departure times to avoid over-crowding

Masks required

Staff would wash masks for students (clean and dirty bucket)

Older students can make masks for themselves and younger students

Eat in the classrooms
